

Types of Renewable Energy Sources

When we refer to a renewable resource, we mean a naturally occurring substance that replenishes itself without human intervention. Renewable resources are considered infinite in the sense that they can perpetually be regenerated at any desired rate by humans.

Sources of renewable resources include solar power, wind power, hydroelectricity, biomass, tides, and geothermal power.

✓ Solar Power

This type of energy comes directly from the sun and is therefore available around the clock throughout the year. In recent years, the cost of solar panels has decreased significantly, thus making this option more attractive than ever before. Solar power is considered clean because it does not emit carbon dioxide or other harmful
