INTRODUCTION

Thank you for choosing BRK Brands, Inc. for your Smoke Alarm needs. We have purchased a state-of-the-art Smoke Alarm designed to provide you with early warning of a fire. Key features include:

Smart Technology designed to help reduce unwanted or nuisance alarms.
Single Button Bed-Silence eliminates confusion. Depending on what mode the alarm is in, pushing the button provides different functions, such as testing the alarm, silencing the alarm, re-testing the alarm when in silent and closing the Latching feature.

Latching Alarm Reducer easily identifies irritating alarm even after the alarm condition has subsided.

Perfect Mount System includes a gel-injection base for easy installation and a non-mounting bracket that keeps the alarm secure over a wide rotation range to allow for perfect alignment.

Quiet Cover is included to keep the alarm clean during construction.

Easy Installation/Maintenance features include a large opening in the mounting bracket for easy access to wiring. A battery pull tab keeps the battery fresh until the home is occupied. A Side Load Battery Cover allows for easy battery replacement without disturbing the alarm from the ceiling or wall (Model 9130 only).

Improved UV Resistance keeps the alarm from discoloring over time.

All First Alert® and BRK® Smoke Alarms conform to regulatory requirements, including UL217 and are designed to detect particles of combustion. Smoke particles of varying number and size are produced in all fires.

Ionization technology is generally more sensitive than photoelectric technology at detecting small particles, which tend to be produced in greater amounts by flaming fires, which consume combustible materials rapidly and spread quickly. Sources of these fires may include paper burning in a wastebasket, or a grease fire in the kitchen.

Photoelectric technology is generally more sensitive than ionization technology at detecting large particles, which tend to be produced in greater amounts by smoldering fires, which may smolder for hours before burning into flaming fires. Sources of these fires may include cigarettes burning in ashtrays or bedclothes.

For maximum protection, use both types of Smoke Alarms on each level and in every bedroom of your home.

FIRE SAFETY TIPS

Always follow rules and avoid hazardous situations: 1) Use smoking materials properly. 2) Never fall asleep with a cigarette lit. 3) Never leave a lit candle unattended. 4) Never burn anything in a paper container. 5) Keep electrical appliances in good condition and don't overload electrical circuits. 6) Hang clothes, barbecue grills, fireplaces and chimney pipes, and downspouts. 7) Never leave animals sleeping on the couch unattended. 8) Keep portable heaters and open flames, like candles, away from flammable materials. 9) Don't let babies play with matches.

Keep alarms clean, and test them weekly. Replace alarms immediately if they are not working properly. Smoke Alarms that do not work cannot alert you to a fire. Make at least one working, non-battery-powered fire alarm, and an additional one in the kitchen. Also, use smoke detectors or other reliable means of escape from an upper floor in case there are stairs.

BEFORE YOU INSTALL THIS SMOKE ALARM

IMPORTANT Read "Recommended Locations for Smoke Alarms" and "Locations to Avoid for Smoke Alarms" before beginning. This unit monitors the air and when smoke reaches its sensing chamber, it alarms. It can give you instant notice for early warning. This unit can ONLY give an early warning of developing fire. If it is installed, maintained and tested, when smoke can reach it, and where all residents can hear it, as described in this manual, this unit will not sense gas, heat, or flame. It cannot prevent or extinguish fires.
