

Questions to ask yourself to prepare for the DBA and module exam

1. What is the relationship between radius and diameter – radius is half of diameter and diameter is two times radius

2. What is the relationship between an inscribed angle and the arc it intercepts- The Inscribed Angle Theorem states that the measure of an inscribed angle is half the measure of its intercepted arc.

3. how do you find circumference and area of a circle- Use the formulas to calculate the circumference and area: $c = 2\pi r$ and $A = \pi r^2$

4. how are arc length and sector area found- Arc length can be determined using the formula $2\pi r \left(\frac{x}{360}\right)$ where x is the measure of the central angle.

Area of a sector can be determined using the formula $A = \pi r^2 \left(\frac{x}{360}\right)$ where x is the measure of the central angle

5. what is the inscribed angle theorem- A quadrilateral ABCD can be inscribed in a circle if and only if a pair of opposite angles is supplementary.

6. what is the equation of a circle - $(x - h)^2 + (y - k)^2 = r^2$, where (h, k) represents the location of the circle's center, and r represents the length of its radius

7. how do you determine the center and radius from an equation of a circle- change it to standard form and complete the square.

Example: $x^2 + y^2 + 24x + 10y + 160 = 0$ || $(x^2 + 24x) + (y^2 + 10y) = -160$

|| Completing the square requires us to take the coefficient on the first degree terms, divide them by 2, and then square the result before adding the result back to both sides. ||
