

• What is HFSS (High Frequency Structure Simulator)?

- *"HFSS is the industry-standard software for S-parameter, full-wave SPICE extraction and electromagnetic simulation of high-frequency and high-speed components. HFSS is widely used for the design of on-chip embedded passives, PCB interconnects, antennas, RF/microwave components, and high-frequency IC packages."*
- *"HFSS improves engineering productivity, reduces development time, and better assures first-pass design success. The latest release of HFSS delivers significant productivity gains to Microwave/RF engineers and expands electromagnetic co-design to a new segment of engineers working in the areas of RF/analog IC and multi-gigabit designs as well as EM/EMC."*

Modeling and Simulation in Engineering, Economics, and Management María Ángeles Fernández-Izquierdo, María Jesús Muñoz-Torres, Raúl León, 2013-06-01 This book contains the refereed proceedings of the International Conference on Modeling and Simulation in Engineering Economics and Management MS 2013 held in Castell n de la Plana Spain in June 2013 The event was co organized by the AMSE Association and the SoGReS Research Group of the Jaume I University This edition of the conference paid special attention to modeling and simulation in diverse fields of business management The 28 full papers in this book were carefully reviewed and selected from 65 submissions They are organized in topical sections on modeling and simulation in CSR and sustainable development modeling and simulation in finance and accounting modeling and simulation in management and marketing modeling and simulation in economics and politics knowledge based expert and decision support systems and modeling and simulation in engineering

Physics of Semiconductor Devices V. K. Jain, Abhishek Verma, 2013-11-27 The purpose of this workshop is to spread the vast amount of information available on semiconductor physics to every possible field throughout the scientific community As a result the latest findings research and discoveries can be quickly disseminated This workshop provides all participating research groups with an excellent platform for interaction and collaboration with other members of their respective scientific community This workshop s technical sessions include various current and significant topics for applications and scientific developments including Optoelectronics VLSI ULSI Technology Photovoltaics MEMS Sensors Device Modeling and Simulation High Frequency Power Devices Nanotechnology and Emerging Areas Organic Electronics Displays and Lighting Many eminent scientists from various national and international organizations are actively participating with their latest research works and also equally supporting this mega event by joining the various organizing committees

New Developments and Applications in Sensing Technology Subhas Chandra Mukhopadhyay, Aimé Lay-Ekuakille, Anton Fuchs, 2011-01-22 This book has focussed on different aspects of smart sensors and sensing technology i e intelligent measurement information processing adaptability recalibration data fusion validation high reliability and integration of novel and high performance sensors in the areas of magnetic ultrasonic vision and image sensing wireless sensors and network microfluidic tactile gyro flow surface acoustic wave humidity and ultra wide band While future interest in this field is ensured by the constant supply of emerging modalities techniques and engineering solutions as well as an increasing need from aging structures many of the basic concepts and strategies have already matured and now offer opportunities to build upon The book has primarily been focussed for postgraduate and research students working on different aspects of design and developments of smart sensors and sensing technology
