

#### DESCRIPTION AND APPLICATIONS

The Electro-Voice RE55 miniature lavalier microphone provides the ultimate in quality and versatility for the professional user. By means of a new internally shock-mounted microphone capsule, the RE55 can offer protection from mechanical noise due to contact with clothes and cord conduction to a degree never before possible. This miniature microphone can be used held in the hand, hung on a neck cord, or suspended on a tie clip assembly, leaving the hands of an announcer or performer free. It is excellent for audience participation, man-in-the-street interviews, panel shows — wherever microphone concealment, individual mobility, or free movement of the hands is desired. No closely associated auxiliary equipment is required.

The RE55 employs a unique new nesting shock-mount principle, similar to that employed in the Electro-Voice Model RE50. The tie clip assembly, if used, and other necessary auxiliary parts are contained in an internal capsule which is precision shock-mounted in highly compliant rubber inside an extremely rugged and durable turned-steel case. The normal problems of mechanical noise conduction associated with lavalier microphones (noises from contact with clothing, from cord contact with clothing and hard objects) are virtually eliminated.

The RE55 features the exclusive Electro-Voice Acoustalloy diaphragm. This non-metallic diaphragm withstands high humidity, temperature extremes, corrosive effects of salt air, and severe mechanical shocks. It is practically indestructible with normal use.

The RE55 is supplied equipped with three specially designed accessories intended to increase the usefulness and mounting convenience of the microphone — a lavalier neck cord assembly from which the microphone can hang, mounted in a normal lavalier fashion on the chest

Dimensions

of the user; a lavalier tie clip assembly, which allows hanging the microphone in a position similar to that of a tie clip; and a belt clip which can be used to keep the cord in constant position with uniform tension on the microphone. The cord assembly is supplied attached to the microphone. Used in conjunction with the neck cord assembly or tie clip assembly, the belt clip also helps to prevent unwanted mechanical noise. After inserting the cable in the clip shown in Figure 1, simply attach it to the belt at one side. It may also be clipped over the edge of a pocket or lapel.

A protective zipper pouch is also provided to house the microphone and its accessories, shielding the microphone from metal filings, airborne magnetic particles and dust when not in use.
