Mathematics Memorandum N2 April 2011:

JSL Vol 26-N2 JOURNAL OF SCHOOL LEADERSHIP, 2016-04-13 JSL invites the submission of manuscripts that contribute to the exchange of ideas and scholarship about schools and leadership. All theoretical and methodological approaches are welcome. We do not advocate or practice a bias toward any mode of inquiry e.g. qualitative vs quantitative, empirical vs conceptual, discipline based vs interdisciplinary and instead operate from the assumption that all careful and methodologically sound research has the potential to contribute to our understanding of school leadership. We strongly encourage authors to consider both the local and global implications of their work. The journal's goal is to clearly communicate with a diverse audience including both school based and university based educators. The journal embraces a broad conception of school leadership and welcomes manuscripts that reflect the diversity of ways in which this term is understood. The journal is interested not only in manuscripts that focus on administrative leadership in schools and school districts but also in manuscripts that inquire about teacher, student, parent and community leadership.

Virtual Fundamental Cycles in Symplectic Topology John W. Morgan, Dusa McDuff, Mohammad Tehrani, Kenji Fukaya, Dominic Joyce, 2019-04-12. The method of using the moduli space of pseudo holomorphic curves on a symplectic manifold was introduced by Mikhail Gromov in 1985. From the appearance of Gromov's original paper until today this approach has been the most important tool in global symplectic geometry. To produce numerical invariants of these manifolds using this method requires constructing a fundamental cycle associated with moduli spaces. This volume brings together three approaches to constructing the virtual fundamental cycle for the moduli space of pseudo holomorphic curves. All approaches are based on the idea of local Kuranishi charts for the moduli space. Workers in the field will get a comprehensive understanding of the details of these constructions and the assumptions under which they can be made. These techniques and results will be essential in further applications of this approach to producing invariants of symplectic manifolds.
