

Researching and Debating a Controversy

ASSIGNMENT

Work collaboratively to research one side of a controversy that is affecting your school, community, or society. Then participate in a modified debate in which you argue your position and incorporate a visual display with appropriate headings and labels and/or multimedia for support.

Planning and Prewriting:

Take time to make a plan for generating ideas and research questions.

- What is your issue, who does this issue affect, and what side will you be arguing?
- How can you state your position clearly as a claim?
- What questions will guide your research?

Researching:

Gather information from a variety of credible sources.

- Where can you find sources, and how can you tell that the sources are reliable, credible, and useful?
- Which strategies will you use to help you understand informational texts?
- How will you take notes by paraphrasing reasons and evidence and recording bibliographic information?

Preparing and Creating:

Plan talking points and create a visual display.

- What kind of graphic organizer could help you select the best reasons and evidence from your research?
- How will you select talking points and create index cards for each point to support your claim? How can you ensure you are using your sources ethically? How can your notes help you use formal, conventional language?
- How will you create a visual that will enhance your talking points?
- How can the Scoring Guide help you evaluate how well you are prepared to meet the requirements of the assignment?

Speaking and Listening:

Actively participate in and observe the class debates.

- How will you ensure you use elements of good public speaking, such as speaking at an appropriate rate and volume with clear enunciation, and using eye contact and natural gestures?
- How will you be sure that you and the other speakers all have the opportunity to voice your opinions?
- How will you use your visual display to support your argument?
- How will you complete a viewing guide to ensure active listening as an audience member?

Reflection

After completing this Embedded Assessment, think about how you went about accomplishing this task and respond to the following:

- Did your position on the issue remain the same or change after the discussion? Explain your position and what caused it to remain the same or change.
- What part of preparing for the debate was your strongest (e.g., researching, organizing the argument, collaboration, creating the visual display)? Explain.
- What part of the debate was your strongest (e.g., explaining ideas, using formal language, speaking, listening)? Explain.

Reshaping Teacher Thinking, Planning and Practice Using Embedded Assessment Letina Ngwenya Jeranyama, 2001

Empowering Excellence Jeff Halstead, 2014-07-02 Empowering Excellence inspires a revolution in teaching and assessment practices. These methods of teaching and grading represent a major step ahead in how teachers assess and interact with students. Empowering Excellence presents 12 significant shifts that encourage motivation, build confidence, and measure what students know and are able to do based on the Common Core State Standards or equivalent standards in a highly supportive, student-centered environment. Teachers, administrators, and education professors will find ideas that will transform classrooms into places where students are filled with confidence and empowered to strive for excellence.

Transforming Assessment Jens Dolin, Robert Evans, 2017-10-14 This book reports the results of a research project that investigated assessment methods aimed at supporting and improving inquiry-based approaches in European science, technology, and mathematics (STM) education. The findings were used to influence policy makers with guidelines for ensuring that assessment enhances learning. The book provides insights about the concept of competence within the STM domains and its relevance for education. The conceptualisation and teaching of four key competences: scientific inquiry, mathematical problem solving, design processes, and innovation. Fundamental aspects of the two main purposes of assessment: formative and summative, the relations between the two purposes and ways of linking them. The main challenges related to the uptake of formative assessment in daily teaching/learning practices in STM and specifically the usability of formative on the fly dialogue, structured assessment dialogue, peer assessment, and written teacher feedback. The systemic support measures and tools teachers need in order to integrate formative assessment of student learning into their classroom practices and how it can conflict with summative assessment practices. How research-based strategies for the formative use of assessment can be adapted to various European educational traditions to ensure their effective use and avoid undesirable consequences. How relevant stakeholders can be invited to take co-ownership of research results and how a productive partnership between researchers, policy makers, and teachers can be established. Concrete research vistas that are still needed in international assessment research.

Classroom Assessment and Educational Measurement Susan M. Brookhart, James H. McMillan, 2019-07-04 Classroom Assessment and Educational Measurement explores the ways in which the theory and practice of both educational measurement and the assessment of student learning in classroom settings mutually inform one another. Chapters by assessment and measurement experts consider the nature of classroom assessment information from student achievement to affective and socio-emotional attributes, how teachers interpret and work with assessment results, and emerging issues in assessment such as digital technologies and diversity/inclusion. This book uniquely considers the limitations of applying large-scale educational measurement theory to classroom assessment and the adaptations necessary to make this transfer useful. Researchers, graduate students, industry professionals, and policymakers will come away with an

essential understanding of how the classroom assessment context is essential to broadening contemporary educational measurement perspectives The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

[Gamification in Education and Business](#) Torsten Reiners, Lincoln C. Wood, 2014-11-22 This book is dedicated to applied gamification in the areas of education and business while also covering pitfalls to avoid and guidelines needed to successfully implement for a project Using different theoretical backgrounds from various areas including behavioral economics game theory and complex adaptive systems the contributors aim to help readers avoid common problems and difficulties that they could face with poor implementation The book's contributors are scholars and academics from the many areas where the key theory of gamification typically comes from Ultimately the book's goal is to help bring together the theories from these different disciplines to the field of practice in education and business The book is divided into four parts Theory Education Business and Use Cases Part I provides a foundation on the theory of gamification and offers insight into some of the outstanding questions that have yet to be addressed In Part II the application and value that gamification can bring within the education sector is examined The book then changes focus in Part III to spotlight the use of gamification within business environments The topics also cover educational aspects like improved learning outcomes motivation and learning retention at the workplace Finally Part IV concentrates on the applications and use of gamification through a series of case studies and key elements that are used in real situations to drive real results
