How to Make Inventions Edward P. Thompson,2015-06-26 Excerpt from *How to Make Inventions Or Inventing as a Science and an Art a Practical Guide for Inventors* The style adopted is that of a lecture and therefore it is hoped that the use of personal pronouns may be overlooked The object in view is to make a mere beginning in the establishment of Inventing as a Science and an Art but especially to present conclusions arrived at in the study of inventors and inventions in order that the capacity of inventors may be enlarged If even a single useful invention results from the perusal of this book I shall feel that the time has not been spent in vain Not knowing how a book with such a title would be accepted preliminary notices were distributed soliciting subscriptions contingent upon publication I am greatly indebted to those who so kindly sent in such subscriptions and especially to those subscribers who wished me success The *Electrical World* New York I also thank for inserting a series of paid articles on this subject prepared and contributed by me during the year 1884 Much encouragement for continuing the development of the subject matter was given by Mr T Commerford Martin editor of *The Electrical Engineer* New York and Mr George H Guy editor of *Electricity* Chicago who so kindly invited me to deliver a lecture upon this subject before the New York Electrical Society in 1890 As may be expected the inventor will in no way be relieved of tedious labor by following any instructions contained in this book I am inclined to believe that this will not be the basis of any criticism which may be rendered by any opponents or prejudiced minds because I have learned and am more and more impressed with what I

believe to be a fact that a lazy inventor has never yet been born No day laborer makes as many hours a day The physician missionary and other philanthropists cannot show a better record for diligence of both the body and the mind In writing this book I have borne this in mind and have felt that there was no danger of making those suggestions and giving that instruction which would be rejected by the inventor simply because much work was involved About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
