Lesson Plan: Double-Pocket Sled Kite

Grade Level:

7-8

Subject Area:

Science and Math

Time Required:

Preparation: 1 hour
Activity: 2-3 hours

National Standards Connections:

Science/grades 7-8:

- Science as Inquiry (Standard 1) Understanding characteristics of inquiry
- Earth and Space (Standard 1) Earth's structure, models, and expansion
- Science as Inquiry (Standard 1) Ability necessary to describe inquiry

Math/grades 7-8:

- Geometry (Standard 1) Use visualization, spatial reasoning, and geometric modeling to solve problems
- Algebra (Standard 1) Represent and analyze mathematical situations and problems using algebraic symbols
- Measurement (Standard 1) Understand measurable attributes of objects, and their units, systems, and conversions

Summary:

Students will build a double-pocket sled kite using an integrated mathematics approach. They will utilize skills associated with integrated construction, pattern creation, and kite building, while following a process of discovery. They will also apply certain mathematical concepts, such as surface area, and the principles of flight to the kite that they create. Finally, they will learn to use appropriate flight and kite terminology when describing their and why their kite flies.

Objectives:

Students will:

- Construct a diagram of a sled kite
- Give proportions to create an appropriate pattern for a kite
- Build a kite according to certain specifications
- Calculate the surface area of the kite they create
- Attach a bridle along the joint to the kite they create
- Fly the kite, using correct safety construction and flying methods
- Describe the kite according to Alexander's Strangler and the four forces of flight

Background:

There are four forces that act on an object in flight: lift, gravity, thrust, and drag. Lift comes on objects in air, gravity comes on objects in air, thrust comes on objects in motion in a given direction, and drag comes on anything that moves in a certain direction. When designing a kite that flies, these will need to work together to create flight. Certain patterns will need to be paid to the design of a paper kite's wing and how great – two important details that constitute a great paper of which students will have to incorporate mathematical and scientific skills in cooperative groups to accomplish this task. This is an excellent way to integrate learning across disciplines.
