Maths Lit Paper 2014:

Handbook of Research on Integrating Digital Technology With Literacy Pedagogies Sullivan, Pamela M.,Lantz, Jessica L.,Sullivan, Brian A.,2019-11-22 The allure and marketplace power of digital technologies continues to hold sway over the field of education with billions spent annually on technology in the United States alone Literacy instruction at all levels is influenced by these evolving and ever changing tools While this opens the door to innovations in literacy curricula it also adds a pedagogical responsibility to operate within a well developed conceptual framework to ensure instruction is complemented or augmented by technology and does not become secondary to it The Handbook of Research on Integrating Digital Technology With Literacy Pedagogies is a comprehensive research publication that considers the integration of digital technologies in all levels of literacy instruction and prepares the reader for inevitable technological advancements and changes Covering a wide range of topics such as augmented reality literacy and online games this book is essential for educators administrators IT specialists curriculum developers instructional designers teaching professionals academicians researchers education stakeholders and students

Singapore Literature and Culture Angelia Poon,Angus Whitehead,2017-03-03 Since the nation state sprang into being in 1965 Singapore literature in English has blossomed energetically and yet there have been few books focusing on contextualizing and analyzing Singapore literature despite the increasing international attention garnered by Singaporean writers This volume brings Anglophone Singapore literature to a wider global audience for the first time embedding it more closely within literary developments worldwide Drawing upon postcolonial studies Singapore studies and critical discussions in transnationalism and globalization essays unearth and introduce neglected writers cast new light on established writers and examine texts in relation to their specific Singaporean local historical contexts while also engaging with contemporary issues in Singapore society Singaporean writers are producing work informed by debates and trends in queer studies feminism multiculturalism and social justice work which urgently calls for scholarly engagement This groundbreaking collection of essays aims to set new directions for further scholarship in this exciting and various body of writing from a place that despite being just a small red dot on the global map has much to say to scholars and students worldwide interested in issues of nationalism diaspora cosmopolitanism neoliberalism immigration urban space as well as literary form and content This book brings Singapore literature and literary criticism into greater global legibility and charts pathways for future developments

New Advances in Information Systems and Technologies Álvaro Rocha,Ana Maria Correia,Hojjat Adeli,Luis Paulo Reis,Marcelo Mendonça Teixeira,2016-03-15 This book contains a selection of articles from The 2016 World Conference on Information Systems and Technologies WorldCIST 16 held between the 22nd and 24th of March at Recife Pernambuco Brazil WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations current trends professional experiences and challenges of modern Information Systems and Technologies research together with their technological

development and applications The main topics covered are Information and Knowledge Management Organizational Models and Information Systems Software and Systems Modeling Software Systems Architectures Applications and Tools Multimedia Systems and Applications Computer Networks Mobility and Pervasive Systems Intelligent and Decision Support Systems Big Data Analytics and Applications Human Computer Interaction Health Informatics Information Technologies in Education Information Technologies in Radiocommunications The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Integrating Higher Education in the Arts, Humanities, Sciences, Engineering, and Medicine, 2018-06-21 In the United States broad study in an array of different disciplines arts humanities science mathematics engineering as well as an in depth study within a special area of interest have been defining characteristics of a higher education But over time in depth study in a major discipline has come to dominate the curricula at many institutions This evolution of the curriculum has been driven in part by increasing specialization in the academic disciplines There is little doubt that disciplinary specialization has helped produce many of the achievements of the past century Researchers in all academic disciplines have been able to delve more deeply into their areas of expertise grappling with ever more specialized and fundamental problems Yet today many leaders scholars parents and students are asking whether higher education has moved too far from its integrative tradition towards an approach heavily rooted in disciplinary silos These silos represent what many see as an artificial separation of academic disciplines This study reflects a growing concern that the approach to higher education that favors disciplinary specialization is poorly calibrated to the challenges and opportunities of our time The Integration of the Humanities and Arts with Sciences Engineering and Medicine in Higher Education examines the evidence behind the assertion that educational programs that mutually integrate learning experiences in the humanities and arts with science technology engineering mathematics and medicine STEM lead to improved educational and career outcomes for undergraduate and graduate students It explores evidence regarding the value of integrating more STEM curricula and labs into the academic programs of students majoring in the humanities and arts and evidence regarding the value of integrating curricula and experiences in the arts and humanities into college and university STEM education programs **Getting Evidence into Education** Stephen Gorard, 2020-03-31 Worldwide there has been considerable progress in the quality of research evidence generated for use in education but not the equivalent growth in knowledge of how best to get this evidence into actual use Yet with far reaching implications all of education is damaged when persuasive but poor quality evidence has widespread influence or good research lies unused Focused on the work of the Durham University Evidence Centre for Education Getting Evidence into Education addresses this problem examining what can be done to improve the take up of suitable research evidence and inform the public service of education Containing a variety of case studies from evidence based policies for early childhood education in Brazil to the use of

evidence on contextualized admissions to Scottish universities the volume explores a variety of different ways to approach the problem addressing the questions What is the existing evidence on different approaches to getting research evidence into use What are the factors which influence the uptake of high quality research evidence by policy or practice Which are the most effective pathways for evidence into use in particular contexts Considering both the practical and ethical implications the book builds towards key recommendations for the research community practitioner bodies and policy makers and advisors directing them on how to communicate better with each other for the benefit of everyone

Writing, Redefined

Shawna Coppola, 2023-10-10 What does it mean to write or to be a writer In Shawna Coppola's book Writing Redefined Broadening Our Ideas of What It Means to Compose she challenges the reader to expand beyond standard alphabetic writing and consider alternative forms of composition when assigning writing to students This book empowers teachers to change what counts as writing in schools and classrooms opening the door to students who may not consider themselves to be writers but should and can Inside you'll find alternative engaging writing assignments that are visual aural or multimodal that will involve all students specifically those Who prefer to compose using a wider array of forms and modes For whom standard English is not the norm Who have been identified as dyslexic Whose cultural traditions lean heavily towards more aural forms of composition Who are considered struggling writers By finding ways to accommodate all styles of writers students are free to unleash their creativity and share their story with others While there is no question composition in written form is important and worth of study broadening our definition of writing expands an enormous range of possibilities for composing for all students

Research for Educational Change

Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators
