

### Remember...

To achieve a fair shot, aim at an animal that is standing or moving straight away from you. Before the gun begins to move or discharge, aim for a better shot.

The most effective location for a turkey is in the head and neck. The preferred shot angle for turkeys is head-on, aiming for the head or neck.

### Vital Shots

Every hunter wants to bring home the game he or she is seeking, and experience is every hunter's best teacher. To achieve these goals, it is essential that you understand the anatomy of the game you're after, and learn how to place a shot for a clean kill.

### Where to Shoot

- The most effective shot for deer is in the vital organs—heart and lungs. In large game animals, these organs lie in the chest cavity behind the front shoulder. A long shot is the most effective shot for big game.
- The area of the vital organs also contains major blood vessels and arteries. A shot in this area causes considerable bleeding. If the animal drops, the mortality will rise to 100%. It will have a blood trail that's easy to track.
- Aside from being a good mechanism, the key to a clean kill is patience. Hunters should fire shots in the vital organs only if you do not have a clear shot to the vital organs, and need the animal's position the best possible shot.

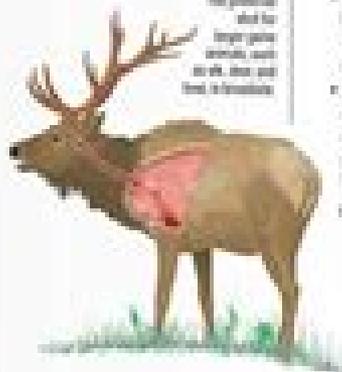

### Choosing the Proper Shot Angle

The shot angle is the angle at which the animal is standing in relation to the hunter. Knowing which angles offer the most effective—and least effective—shots is an essential part of being a responsible hunter.

- **Head-on.** The head-on shot angle is the preferred shot angle for both hunters and best hunters for large game animals, such as elk, deer, and bear.
  - **Elk and Deer:** The head-on position offers several excellent shots for a hunter-hunter. The best target is the shoulder and chest area. A bullet of the correct weight that is fired from a distance adequate for the game will break the shoulder bone and sever the lungs or liver.
  - **Bear:** The head-on angle offers the best shot for the largest big game animals, such as elk, deer, and bear. For most big game, the aiming spot is straight up from the back side of the front leg, one-third of the way up from the hump of the chest. An arrow will penetrate the ribs but not the shoulder bone, and will do most of its damage to the heart and lungs.
- **Quartering Away.** The quartering away shot angle is when your target is facing away from you but at an angle. The animal is usually looking away from you.
  - **Elk and Deer:** For hunters-hunters, the quartering away position offers several aiming spots on all big game. The one just behind the shoulder is the best aiming spot for those practitioners of the vital organs. There are hitting the chest area above the opposite front leg.

The preferred shot for large game animals, such as elk, deer, and bear is head-on.

### Firing Positions

There are four standard rifle firing positions: prone, standing, sitting, and kneeling.

#### Prone

The prone position is the most stable of the four positions. Because it's the easiest to hold, it's the best position for maximizing the effectiveness of long-range, heavy-caliber, sniper rifles and bolt-action rifles.

### Safety Tip

Shooting a firearm can cause explosion and projectile injury and can be deadly if not done properly.

- When shooting any firearm, always wear properly fitting eye protection for legal practice, use an earplug or earmuff or both, with a high noise reduction rating (NRR).

When hunting, use discretion in when to shoot. Always be alert and aware of your surroundings. Be sure to follow the laws, regulations, and the National Hunting Conservation Commission website at [www.fws.gov/hunting](http://www.fws.gov/hunting).

- Use your visible eye protection, such as shooting glasses with high impact lenses, when shooting to protect your eyes.

#### Standing

With neither arm supported, this is the most difficult position for firing an accurate shot. Rather than trying to hold the barrel steady, which is impossible, try to keep movement of the barrel to a minimum. Smooth, natural motions will produce the best shot.

#### Sitting

Both arms are supported by your legs. Next to the prone position, this is the most stable position.

#### Kneeling

With only one arm braced, the kneeling position is less steady than the prone and sitting positions.
