

Philosophy Paper

1. Every paper you write for me will be based on the same basic assignment: state a thesis and defend it, employing textual citations and inferences to support that thesis. That is, you must stake out a position that you take to be the most plausible then offer text-based and illustrative, reasoned arguments for that view.

Two kinds of papers you do not want to write: first, the “book report.” Although an explanatory synopsis of the author’s position is a critical and essential aspect of a philosophy paper, this exposition should not be mere restatement of the text itself. “Book report” essays simply regurgitate the language and claims of the author without attempting to explain the reasons for or presuppositions of those claims. They therefore demonstrate no attempt to comprehend the ideas expressed by the readings. While you will **always** need to provide a synopsis of the argument your essay addresses, note that a synopsis, rather than restating the text, offers a concise presentation of the relevant arguments of the text, one that explicates/illustrates their presuppositions and significance. A book report reiterates; philosophical synopsis contextualizes and illuminates. Often a thesis is nothing more than an argument about how a particularly knotty philosophical passage should best be understood.

The other paper you do not want to write is “thoughts on topic X,” or “meditations on X,” or “remarks on X.” It will not do to simply string together various reflections you may have on a given topic, even if in the course of doing this you embrace various claims and offer some reasons for your views before moving to the next reflection. If the paper is responding to a given topic, it **must** address that topic squarely and directly. Paper topics are not suggestions or launching points for your own theory; they are crafted specifically to foster engagement with a particular philosophical problem. Do not try to “go around” the problem by subordinating it to what you take to be a more relevant problem (it rarely is). Whether you respond to a prompt or are asked to create your own thesis, the contents of the paper should be selected and organized so as best to defend that central claim. No matter how seemingly brilliant, mere reflections do not constitute a persuasive philosophical argument.

2. So the paper should state a central thesis and defend it. In doing so, it should adhere to the following clarifications:

A) It should start with a clear statement of the thesis. This need not be the very first sentence, but it should almost always come in the first paragraph. Many papers never give a precise statement of the thesis at all. They leave the reader guessing the author’s position. It may seem obvious to you what your position is; it won’t be obvious to the reader. Other papers give a clear statement of the thesis, but not until the last paragraph of the paper. (“Oh! Is that what the author was driving at?!”) This may be a dramatic way to structure a mystery novel but it is a poor way to structure an argumentative paper. The reader’s job is not to figure out what your view is but to evaluate how good a job you do of defending it.
