**Summary of assessment(s), including results and instructional implications:**

D is a 12-year-old African American male who is currently attending regular 6<sup>th</sup> grade classes at Middle School. He is currently repeating 6<sup>th</sup> grade. D was referred by his 6<sup>th</sup> grade teachers due to chronic externalizing behavior problems and poor academic performance. D presents with cognitive abilities in the Deficient range (WISC-III Full Scale IQ=66), academic achievement scores that range from Borderline to Low Average (WJ-III Broad Reading=81, Broad Math= 75, Broad Written Language=70), and documented deficits in the adaptive behavior (VABS Classroom Edition Communication=43, Daily Living Skills =64, Socialization=58). Results from the BASC indicate the presence of significant externalizing behavior problems, deficits in social adaptive skills, and deficits in attention and learning. D's deficits in cognitive abilities, academic skills, and adaptive behavior are indicative of mild mental retardation and are contributing significantly to his externalizing behavior problems in the classroom setting. It is not apparent that D's behavior problems are indicative of an emotional disturbance. It is recommended that D be considered by the evaluation team for primary special education placement in Developmentally Handicapped (DH) with behavioral support services provided as needed.

Handbook of Clinical Interviewing With Adults Michel Hersen, Jay C. Thomas, 2007-08-08 Clinical interviewing with adults is both an art and a science. This handbook will appeal to a wide range of clinical researchers, therapists, interns, and graduate students new to the complexities of the clinical interview and diagnostic process. The comprehensive range of topics and coverage that includes case illustrations with dialogue and differential diagnosis and comorbidity will be highly attractive features to researchers, professional therapists, and graduate students. The Hersen and Thomas team is highly qualified to succeed in this ambitious set of three projects. Carolyn Brodbeck, Chapman University. The Handbook of Clinical Interviewing with Adults is one of three interrelated handbooks on the topic of interviewing for specific populations. It presents a combination of theory and practice plus concern with diagnostic entities for readers who work or one day will work with adults in clinical settings. The volume begins with general issues: structured versus unstructured interview strategies, mental status examinations, selection of treatment targets, and referrals. Writing up the intake interview etc. moves to a section on major disorders most relevant to adult clients: depression, bipolar disorder, agoraphobia, posttraumatic stress disorder, eating disorders, alcohol and drug abuse, sexual dysfunction etc. and concludes with a chapter on special populations and issues: neurologically impaired patients, older adults, behavioral health consultation etc. Psychopathology Kenneth Carter, 2022-12-22 Carter's Psychopathology is an accessible, engaging, and well-organized text covering the study, understanding, diagnosis, treatment, and prevention of psychological disorders. Fully integrating gender and culture in the presentation of mental disorders and using a sensitive and inclusive language to encourage an empathic approach to psychopathology, this introductory textbook offers students a strong foundation of the socio-cultural factors influencing how we treat mental disorders. Featuring boxes such as the power of words, promoting the use of respectful, empathic language, and the power of evidence, demonstrating that scientific evidence can answer questions about psychopathology treatments, real-world case studies, and examples, concept checks, questions to test the student's mastery of the material covered in each section, chapter summaries listing the take-home points discussed, and key terms and glossary highlighting terms that students will need to understand and become familiar with, this textbook provides a hands-on approach to the study of psychopathology. Diagnosis and Treatment Planning Skills for Mental Health Professionals, 2011 If you are interested in finding a text that creatively describes common clinical issues, this is your book. Distinguished pop culture in counseling authors and educators Schwitzer and Rubin collaborate on this vast compilation of material to present step-by-step directions using often poignant vignettes within a DSM counseling paradigm. A must-read for all counselors, psychotherapists, and popular culture enthusiasts. Thelma Duffey, Editor, The Journal of Creativity in Mental Health, University of Texas at San Antonio. **Handbook of Clinical Interviewing With Children** Michel Hersen, Jay C. Thomas, 2007-08-08 The Handbook of Clinical Interviewing with Children is one of three interrelated handbooks on the topic of interviewing for specific

populations It presents a combination of theory and practice plus concern with diagnostic entities for readers who work or one day will work with children and their parents and teachers in clinical settings The volume begins with general issues structured versus unstructured interview strategies developmental issues when working with children writing up the intake interview etc moves to a section on major disorders with special relevance for child populations conduct disorders attention deficit hyperactivity disorder learning disorders etc and concludes with a section addressing special populations
