Handbook of Human Centric Visualization Weidong Huang,2013-08-13 Visualizations are visual representations of non visual data They are produced for people to interact with and to make sense of the underlying data Rapid advances in display technology and computer power have enabled researchers to produce visually appealing pictures However the effectiveness of those pictures in conveying the embedded information to end users has not been fully explored Handbook of Human Centric Visualization addresses issues related to design evaluation and application of visualizations Topics include visualization theories design principles evaluation methods and metrics human factors interaction methods and case studies This cutting edge book includes contributions from well established researchers worldwide from diverse disciplines including psychology visualization and human computer interaction This handbook is designed for a professional audience composed of practitioners lecturers and researchers working in the field of computer graphics visualization human computer interaction and psychology Undergraduate and postgraduate students in science and engineering focused on this topic will also find this book useful as a comprehensive textbook or reference   Data Structures and Algorithms in Java, International Student Version Michael T. Goodrich,Roberto Tamassia,Michael H. Goldwasser,2014-06-16 The design and analysis of efficient data structures has long been recognized as a key component of the Computer Science curriculum Goodrich and Tomassia s approach to this classic topic is based on the object oriented paradigm as the framework of choice for the design of data structures For each ADT presented in the text the authors provide an associated Java interface Concrete data structures realizing the ADTs are provided as Java classes implementing the interfaces The Java code implementing fundamental data structures in this book is organized in a single Java package net datastructures This package forms a coherent library of data structures and algorithms in Java specifically designed for educational purposes in a way that is complimentary with the Java Collections Framework   Pacific CRYSTAL Centre for Science, Mathematics, and Technology Literacy: Lessons Learned Larry D.
