Holistic Special Education Robin Jackson, 2006 Parents and professionals working with special needs children are often faced with difficult decisions about the best ways to educate such children This book presents a case for holistic special education as practiced by Camphill villages and schools Camphill s holistic approach embraces education and therapy in a number of different forms including all aspects of care from nutrition and daily skills to bedtime routines as well as craft

work and medical treatment. It emphasizes the importance of the creative arts alongside core aspects of curriculum such as literacy and math. Camphill philosophy holds that the relationship between the child and the adult coworker should be one of mutual teaching and learning. It recognizes parents not as recipients of a service but as equal and active partners while striving to develop the physical, mental, and spiritual aspects of a child. Written by people who are actively involved in holistic special education on a daily basis, this is an honest and informative manual that will be valued by parents and professionals alike.

Prescribing Nature Patricia H. Hasbach, 2025-10-21. Bring nature to your therapy room or take therapy into nature. Psychotherapy has traditionally occurred in office spaces and focused on issues that stop at the urban boundary. But with the growing impacts of climate-related anxiety and trauma and mounting evidence that contact with nature has powerful psychological, emotional, and restorative benefits, more clinicians are turning to the practice of ecotherapy to help their clients heal. Ecopsychology pioneer Patricia Hasbach provides an ecotherapy model for mental health professionals looking to incorporate the natural world into their work. The book starts with an Overview section that highlights the theoretical foundations of ecotherapy, the importance of expanding the context of care to include ecological systems, and reviews current research on the benefits of nature interactions. The Practice of Ecotherapy section covers topics that examine the development of an environmental identity and the concept of the ecological Self. This section suggests practices for working with clients that include nature as a partner in the therapeutic process through creating restorative environments in the office, moving therapy sessions outdoors, and writing nature prescriptions to encourage direct interactions with the natural world. Lastly, the Practical Considerations section covers a wide range of topics, including challenges and ethical considerations unique to ecotherapy, various forms of ecotherapy, and special populations where ecotherapy can be especially effective treatment. This section also covers the efficacy of ecotherapy to address climate-related anxiety and trauma and future directions for the field. Whether you are interested in moving therapy sessions outdoors, writing nature prescriptions for clients, or bringing the outdoors into your office, here you will find practical strategies that will broaden the lens of your therapeutic practice to include the vital human-nature relationship.
