

Types of logical reasoning

analogical reasoning

using relational patterns by
noticing similarities

saying "this thing is like that thing
in this way"

noting the ways things correspond
between the structures of one
system and another system

abductive reasoning

looking at the facts or situations before
you and creating "most likely in the face
of the facts" explanations

using reasoning such as Occam's razor
(when choosing between possible
explanations, choose the simplest one
with the fewest assumptions)

inductive reasoning

starting from individual observations and
drawing generalizations

making and testing conjectures

moving from the specific to the general

deductive reasoning

starting from accepted or agreed
statements and using logical
arguments to draw valid conclusions

constructing chains of reasoning using
logical consequences
