Normal Instructor, 1910      *Perspectives on Conceptual Change* Barbara J. Guzzetti, Cynthia R. Hynd, 2013-12-16

*Perspectives on Conceptual Change* presents case study excerpts illustrating the influence on and processes of students' conceptual change and analyses of these cases from multiple theoretical frameworks. Researchers in reading education have been investigating conceptual change and the effects of students' prior knowledge on their learning for more than a decade. During this time, this research had been changing from the general and cognitive average effects of interventions on groups of students to the specific and personal individuals' reactions to and conceptual change with text structures. Studies in this area have begun to focus on the social contextual and affective influences on conceptual change. These studies have potential to be informed by other discourses. Hence, this book shows the results of sharing data in the form of case study excerpts with researchers representing varying perspectives of analyses. Instances of learning are examined from cross-disciplinary views. Case study authors in turn respond to the case analyses. The result is a text that provides multiple insights into understanding the learning process and the conditions that impact learning.      *Normal Instructor and Teachers World*, 1910

**Ecological Parasitology** Gerald W. Esch, 2015-10-06 Professor Gerald Esch has already published two books in what is becoming an informal series of essays exploring the way that discoveries about the biology of parasites have influenced ecological and evolutionary theories over a career that has spanned nearly 50 years. This book will be the third set of essays and will focus on key moments of discovery and explore how these achievements were due to collaboration, mentoring, and community building within the field of ecological parasitology. The book will not only describe case studies, pure science, and biology but also act as a career guide for early career ecologists, emphasizing the importance of collaboration in the advancement of science.      *Shaping the Bar* Joan Howarth, 2022-12-13 The comprehensive source on attorney licensing and how to reform it. In *Shaping the Bar*, Joan Howarth describes how the twin gatekeepers of the legal profession, law schools and licensers, are failing the public. Attorney licensing should be laser-focused on readiness to practice law with the minimum competence of a new attorney. According to Howarth, requirements today are both too difficult and too easy. Amid the crisis in unmet legal services, record numbers of law school graduates disproportionately, people of color are failing bar exams that are not meaningful tests of competence to practice. At the same time, after seven years of higher education, hundreds of thousands of dollars of law school debt, two months of cramming legal rules, and success on a bar exam, a candidate can be licensed to practice law without ever having been in a law office or even seen a lawyer with a client. Howarth makes the case that the licensing rituals familiar to generations of lawyers, unfocused law degrees, and obsolete bar exams are protecting members of the profession more than the public. Beyond explaining the failures of the current system, this book presents the latest research on competent lawyering and examples of better approaches. This book presents the path forward by means of licensing changes to protect the public while building an inclusive, diverse, competent, ethical profession. Thoughtful and
