Jkuat Information Technology 2015 Undergraduate:

Handbook of Research on Nurturing Industrial Economy for Africa's Development Nafukho, Frederick Muyia, Boniface Makulilo, Alexander, 2021-03-19 A robust manufacturing sector is a necessity and a sufficient condition for any country's human and economic development as it creates employment and alleviates poverty. During this Fourth Industrial Revolution era, there is an urgent need in Africa to optimally utilize the existing resources to support manufacturing or else risk allowing the continent to fall behind in the industrial economy. Innovative strategies are needed that can unlock Africa's manufacturing potential by exploring key areas that may help Africa mature and launch modernized economies that will benefit the developed world's industrial economy. The Handbook of Research on Nurturing Industrial Economy for Africa's Development examines various innovations necessary for Africa's economic development, including drivers of the manufacturing economy such as education, agriculture, human capital, science, and technological innovations, language, politics, and business environments. The book explores strategies to increase Africa's economic diversity, complexity, productivity, and ultimately competitiveness, and for the continent to realize its manufacturing industrial potential. Further chapters focus on African countries' industrial economies in the African context and facilitating the fulfillment of the Sustainable Development Goals (SDGs) and the African Union's Agenda 2063. This book is a valuable reference tool for government officials, economists, industrialists, practitioners, stakeholders, researchers, academicians, and students interested in the industrial economic development of Africa.

Dare to Invent the Future Clapperton Chakanetsa Mavhunga, 2023-11-21 A rallying manifesto for the innovative problem-solving we need to build a better, more verdant and sustainable planetary existence. Academics are letting Africa down. With all that we know, what do we have to show for it? Whose lives have been changed for the better by it? What have we done for and with our communities lately? In this provocative book, the first in a trilogy, Clapperton Chakanetsa Mavhunga argues that our critical thinkers must become actual thinker-doers. Taking its title from one of Thomas Sankara's most inspirational speeches, *Dare to Invent the Future* looks for moments in Africa's story where precedents of critical thought and knowledge in service of problem-solving are evident to inspire readers to dare to invent such a knowledge system. Mavhunga revisits insights from Edward Wilmot Blyden, Booker T. Washington, Aimé Césaire, Frantz Fanon, Amílcar Cabral, Julius Nyerere, and Thomas Sankara to illustrate how the academic disciplines have been and could be deployed in the service of and through problem-solving, building on what people are doing and know. At its core, he writes, knowledge in the service of and through problem-solving derives from reading the past for new questions, doing due diligence in the present, and contriving an anticipatory approach toward the future. Questioning the fundamental premises of Western and white knowledge production, especially regarding science and technology, Mavhunga proposes in this book refreshingly new approaches to thinking, doing that stem from African realities in the hopes of inspiring a generation that will run toward, not away from, problems to solve them.
