Jonathon Porritt, 2021-04-06 A book for facing head on and averting the oncoming global climate change disaster by inspiring people to move from general concern and passive support to active protagonists for change Climate change is our era's defining issue We know beyond reasonable doubt that climate change is accelerating To face a challenge greater than humanity has ever seen before we must also accelerate ourselves by summoning a sense of urgency courage and shared effort to match it Jonathan Porritt's Hope In Hell is meant to do just that by confronting the issue directly and strongly but also with inspiration and hope it's not too late to avoid the worst consequences of climate change Ultimately optimistic despite the dire challenge presented to the world Porritt explores current science and new technologies mobilization of younger people and political action and encouraging intergenerational solidarity as older generations learn their own responsibilities in creating a better world for their successors *Globalization Development and Social Justice* Ann El Khoury, 2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of

global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies
