MathWise books are specially designed to be unique and effective Most math textbooks and workbooks have a mini lecture at
the beginning of each lesson and then have pages of problems Students often get impatient with the explanations and have
difficulty knowing how to proceed to work the problems The format looks dry and boring and students lose interest MathWise
books communicate with students as they work through the book The answer boxes teach good technique neatness and
organization Students are guided through the steps in a friendly way with speech bubbles giving hints and explanations
MathWise books emphasize deeper level understanding of the material how and why math works the way it does The key is
Understand more memorize less MathWise books all work together to ensure the development of strong number sense and
mathematical thinking MathWise Linear Equations starts with the basics of graphing and progresses to a wide range of
topics including Slope Slope intercept form Solving for intercepts Solving for x or y values Finding equations from 2 points
Standard form equations Point Slope equations Linear inequalities Systems of equations SPECIAL FEATURES Tips and
Tricks Students have found the tips and tricks to be helpful and memorable and they have also found that they add interest
and excitement to their math studies Speech Bubbles with Teacher Insights Speech bubbles are used to provide guidance
point out insights or give helpful hints as students are solving math problems Students learn best by doing and the
instruction given in the speech bubbles is designed to 1 sharpen students powers of observation 2 increase number sense
and 3 instruct in digestible chunks Simplicity of Instruction Every page excluding review pages or quizzes has a specific
focus Most pages have generous amounts of white space to keep students focused Movement is from the simple to the
increasingly complex Step By Step Procedures Students learn best when given explicit step by step instruction When several
steps are involved the steps are numbered This makes learning much more logical and memorable Logical Sequential
Instruction Carefully designed problems are presented in a logical sequence so that previous answers contribute to students
abilities to solve future problems The order in which math problems are presented is critical to promoting number sense This
edition comes with an answer key and is reproducible for single classroom use Making Sense of Equations Randy
Palisoc,2014-10-28 Whether you realize or not mathematics is actually a language The purpose of a language is to
communicate and mathematics is how we communicate about quantities and logical relationships We do so by using signs

symbols and other mathematical terms One of the most important communication tools in the language of math is an equation When students can use equations fluently it helps them communicate in math more precisely and it helps them more easily make sense of math Equations help us solve a variety of problems from figuring out how many laps a swimmer must complete during her workout to figuring out how much it will cost to go on vacation Like any communication tool equations are full of nuances These countless little details can either cause a great deal of confusion or they can be opportunities to build precision and fluency Making Sense of Equations focuses on precision and fluency and it helps students notice the little details that have a big impact on understanding
