

Gas Laws Simulation

Use the following simulation to explore the relationship between pressure, volume, and temperature.

1. Describe the three different gases (pressure, molecular mass/weight, and speed/velocity).

2. For each gas, describe the relationship between pressure and volume (show graph).
3. How do pressure? Particles behave differently when volume and volume (show graph).
4. What the relationship is for a fixed amount of gas in the P vs V.
5. How do pressure? Particles are very dependent and moving randomly along the container (show graph or video simulation).

Investigate the relationship:

1. Investigate the relationship between the volume and temperature (show graph).
2. What the relationship is?
3. How do the relationship between the volume and the temperature?
4. What the relationship is?
5. How do the relationship between the volume and the temperature?

Temperature: constant amount of gas	
Temperature	Volume (liters)
300 K	1.00 L
400 K	1.33 L
500 K	1.50 L

6. What relationship between the temperature of a quantity of gas and the pressure of constant volume? As the temperature of a quantity of gas increases, the pressure of constant volume increases.
