

Don't Be Fooled

A LIST OF LOGICAL FALLACIES

to Watch Out For!

Logical fallacies are errors in reasoning that can be used to manipulate or deceive people. They are common in debates, arguments, and even in everyday conversations. By understanding these fallacies, you can avoid being misled and make more informed decisions.

LOGICAL FALLACY	DESCRIPTION
Ad Hominem	Attacking the person making the argument instead of addressing the argument itself.
Straw Man	Misrepresenting or exaggerating someone's argument to make it easier to attack.
False Dilemma	Presenting only two options as if they are the only choices, when in reality there may be other options.
Slippery Slope	Suggesting that one event will lead to a chain reaction of negative events without providing evidence for the claim.
Appeal to Authority	Using the opinion of an authority figure as evidence, without considering whether the authority figure is actually an expert on the subject.
Bandwagon	Arguing that something is true or right simply because many people believe it or do it.
Hasty Generalization	Drawing a conclusion based on insufficient evidence or a small sample size.
False Cause	Assuming that because two things happen at the same time, one caused the other.
