## LEARNED EVOLUTION VIRTUAL LAB

### QUESTIONS

Answer the following questions as you finish each scenario at the virtual lab.

#### Scenario 1: 1880s

1. As you begin the virtual lab, you will see a field with eight birds and a population of 1000. What happens when you introduce a disease that causes some birds to die?

Initially, the birds in groups were big and black. However, the birds that died were small and white. This is because the disease targeted the birds that were small and white.

2. An adaptation is a trait that helps an organism survive in its environment. In this scenario, the birds that were small and white died because they were not able to fly as well as the birds that were big and black.

Evolutionary change is the change in the characteristics of a population over time. In this scenario, the birds that were small and white died, and the birds that were big and black survived.

3. Evolution is the change in the characteristics of a population over time. In this scenario, the birds that were small and white died, and the birds that were big and black survived.

They survived because they were able to fly as well as the birds that were big and black.

4. Evolutionary change is the change in the characteristics of a population over time.

Species with similar body types and habitats. One example of this is the birds that were small and white, and the birds that were big and black.

5. Evolutionary change is the change in the characteristics of a population over time.

Evolutionary change is the change in the characteristics of a population over time. In this scenario, the birds that were small and white died, and the birds that were big and black survived.
