Mistakes in spelling, punctuation and grammar may be penalised in any part of the paper

(The following passage is adapted from a combination of extracts from speeches by the late Vice President of Zimbabwe, Cde S.V. Muzenda, and the former Minister of Education, Cde D. Muzumbuka.)

ZIMBABWE NEEDS TO BE A NATION OF THINKERS AND DOERS

1. Our government is clearly set on a reconstruction and development course that has at its core, the quantitative and qualitative improvement in educational provision. The nation's greatest resource is its human element. We therefore, need to develop the youths' immense potential and harness it for the future manpower needs of Zimbabwe. The learners we educate are the future of Zimbabwe and we must tailor their education to service the needs of this country. Therefore, we need to make our curriculum uniquely relevant to our own unique situation.
2. We have so far witnessed a massive expansion in education, particularly in the secondary sector. Such unprecedented expansion was unknown in our country and more is in store for us.
3. However, an increase in numbers alone will not achieve the desired effect. Government holds the view that education must service all sectors of the economy by developing a wide variety of intellectual, social, economic, technical and agricultural skills that are not only saleable and employable in agriculture, commerce, industry, mining, and scientific research but are characterised by a high enterprise capacity that will see the country fully utilising our inherited natural resources. For education to be relevant, it must develop the capacity to produce youths who are academically and practically equipped to man all sectors of our economy. A look at our past and present scenarios will help to underline the significance of our new thrust. Thousands of youths have pursued an academic type of education. True, some have been able to weave their way into various companies and organisations but the majority have ended up jobless and even helpless after graduating at various exit points. They have a lot of irrelevant academic knowledge without expertise in technical, vocational and scientific fields.
