Equivariant Cohomology of Configuration Spaces Mod 2 Pavle V. M. Blagojević, Frederick R. Cohen, Michael C. Crabb, Wolfgang Lück, Günter M. Ziegler, 2022-01-01 This book gives a brief treatment of the equivariant cohomology of the classical configuration space $F R^d n$ from its beginnings to recent developments This subject has been studied intensively starting with the classical papers of Artin 1925 1947 on the theory of braids and progressing through the work of Fox and Neuwirth 1962 Fadell and Neuwirth 1962 and Arnold 1969 The focus of this book is on the mod 2 equivariant cohomology algebras of $F R^d n$ whose additive structure was described by Cohen 1976 and whose algebra structure was studied in an influential paper by Hung 1990 A detailed new proof of Hung's main theorem is given however it is shown that some of the arguments given by him on the way to his result are incorrect as are some of the intermediate results in his paper This invalidates a paper by three of the authors Blagojević Lück and Ziegler 2016 who used a claimed intermediate result in order

to derive lower bounds for the existence of k regular and l skew embeddings Using the new proof of Hung's main theorem new lower bounds for the existence of highly regular embeddings are obtained Some of them agree with the previously claimed bounds some are weaker Assuming only a standard graduate background in algebraic topology this book carefully guides the reader on the way into the subject It is aimed at graduate students and researchers interested in the development of algebraic topology in its applications in geometry
