Geospatial Technologies for All Ali Mansourian, Petter Pilesjö, Lars Harrie, Ron van Lammeren, 2018-03-23 This book presents the research papers accepted for the 21st AGILE Conference on Geographic Information Science held at Lund University Geographical Information Systems GIS Centre Sweden on 12-15 June 2018. It discusses the role of geospatial technologies in the digitalization of society and is intended primarily for professionals and researchers in fields that can benefit from geoinformation both within and outside the area of geographic information science. *Hyperspectral Remote Sensing* Ruiliang Pu, 2017-08-16 Advanced imaging spectral technology and hyperspectral analysis techniques for multiple applications are the key features of the book. This book will present in one volume complete solutions from concepts fundamentals and methods of acquisition of hyperspectral data to analyses and applications of the data in a very coherent manner. It will help readers to fully understand basic theories of HRS, how to utilize various field spectrometers and bioinstruments, the importance of radiometric correction and atmospheric correction, the use of analysis tools and software, and determine what to do with HRS technology and data. Map Librarianship Susan Elizabeth Ward Aber, Jeremy Aber, 2016-11-04 Map Librarianship identifies basic geoliteracy concepts and enhances reference and instruction skills by providing details on finding, downloading, delivering, and assessing maps, remotely sensed imagery, and other geospatial resources and services primarily from trusted government sources. By offering descriptions of traditional maps, geographic information systems, GIS, remote sensing, and other geospatial technologies, the book provides a timely and practical guide for the map and geospatial librarian to blend confidence in traditional library skill sets. Includes rarely discussed concepts of citing and referencing maps and geospatial data, fair use, and copyright. Creates an awareness and appreciation of existing print map collections while building digital stewardship with surrogate map and aerial imagery collections. Provides an introduction to the theory and applications of GIS, remote sensing, participatory neogeography, and neocartography practices and other geospatial technologies. Includes a list of geospatial resources with descriptions and illustrations of commonly used map types and formats, online geospatial data sources, and an introduction to the most commonly used geospatial software packages available on both desktop and mobile platforms. *Advances in Networks, Intelligence and Computing* Ashok Kumar, Geeta Sharma, Anil Sharma, Pooja Chopra, Punam Rattan, 2024-05-24 The year 2023 marks the 100th birth anniversary of E. F. Codd (19 August 1923 – 18 April 2003), a computer scientist who, while working for IBM, invented the relational model for database management, the theoretical basis for relational databases and relational database management systems. He made other valuable contributions to computer science, but the relational model, a very influential general theory of data management, remains his most mentioned, analyzed, and celebrated achievement. School of Computer Application, under the aegis of Lovely Professional University, pays homage to this great scientist of all times by hosting CODD100 International Conference on Networks, Intelligence and Computing (ICONIC 2023).
