**What's Wrong with the United Nations and How to Fix it** Thomas G. Weiss,2013-05-20 Six decades after its establishment the United Nations and its system of related agencies and programs are perpetually in crisis While the twentieth century s world wars gave rise to ground breaking efforts at international organization in 1919 and 1945 today s UN is ill equipped to deal with contemporary challenges to world order Neither the end of the Cold War nor the aftermath of 9 11 has led to the next generation of multilateral institutions But what exactly is wrong with the UN and how can we fix it Is it possible to retrofit the world body In his succinct and hard hitting analysis Thomas G Weiss takes a diagnose and cure approach to the world organization s inherent difficulties In the first half of the book he considers the problems of international leadership and decision making in a world of self interested states the diplomatic difficulties caused by the artificial divisions between the industrialized North and the global South the structural problems of managing the UN s many overlapping jurisdictions agencies and bodies and the challenges of bureaucracy and leadership The second half shows how to mitigate these maladies and points the way to a world in which the UN s institutional ills might be cured His remedies are not based on pious hopes of a miracle cure for the UN but rather on specific and encouraging examples that could be replicated With considered optimism and in contrast to received wisdom Weiss contends that substantial change in intergovernmental institutions is plausible and possible The new and expanded second edition of this well regarded and indispensable book will continue to spark debate amongst students scholars and policymakers concerned with international politics as well as anyone genuinely interested in the future of the United Nations and multilateral cooperation

Singh, Pawan K. Dhar, 2020-02-18 *Genome Engineering via CRISPR Cas9 Systems* presents a compilation of chapters from eminent scientists from across the globe who have established expertise in working with CRISPR Cas9 systems. Currently, targeted genome engineering is a key technology for basic science, biomedical, and industrial applications due to the relative simplicity to which they can be designed, used, and applied. However, it is not easy to find relevant information gathered in a single source. The book contains a wide range of applications of CRISPR in research of bacteria, virus, algae, plant, and mammalian, and also discusses the modeling of *Drosophila*, zebra fish, and protozoan among others. Other topics covered include diagnosis, sensor, and therapeutic applications, as well as ethical and regulatory issues. This book is a valuable source not only for beginners in genome engineering but also for researchers, clinicians, stakeholders, policy makers, and practitioners interested in the potential of CRISPR Cas9 in several fields. Provides basic understanding and a clear picture on how to design, use, and implement the CRISPR Cas9 system in different organisms. Explains how to create an animal model for disease research and screening purposes using CRISPR. Discusses the application of CRISPR Cas9 systems in basic sciences, biomedicine, virology, bacteriology, molecular biology, neurology, cancer, industry, and many more.

**Sing Out**, 1992 **A Prescription for Dignity** Michael L. Perlin, 2016-03-16 Examining the treatment of persons with mental disabilities in the criminal justice system, this book offers new perspectives that are crucial to an understanding of the ways in which society projects onto criminal defendants prejudices and attitudes about responsibility, free will, autonomy, choice, public safety, and the meaning and purpose of punishment, all with a focus on ways to enhance dignity in the criminal trial process. It is a detailed exploration of issues of adequacy of counsel, the impact of international human rights law following the ratification of the United Nations Convention on the Rights of Persons with Disabilities (CRPD), the role of mental health courts, and the influence of therapeutic jurisprudence, procedural justice, and restorative justice on the legal process. It considers all of these perspectives in the context of criminal justice system issues such as competency findings, the insanity defense, and sentencing. Demonstrating how the question of treatment of persons with mental disabilities in the criminal justice system is not only a vital one for both scholars and practitioners but also a central facet of international human rights law, this book suggests policy development, further scholarly inquiries, and newly invigorated thinking and action to place dignity at the core of the criminal justice system.
