Duke, 2018-01-18 Edited by a recognized leader in the field

Herbicide Resistant Crops is the first book to cover all of the issues related to the controversial topic of herbicide resistant crops. It provides extensive discussions of the modern biotechnological methods that have been used to develop such crops and reviews the implications both positive and negative of developing crops that are resistant to herbicides. The creation and anticipated applications of specific herbicide resistant crops are also discussed. In addition, the book covers the potential impact of herbicide resistant crops on weed management practices and the environment and presents issues related to the regulation and economics of these crops. The editor has brought together a diverse group of professionals representing the several distinct areas impacted by the new technology of herbicide resistant crops. The wide range of viewpoints presented in this book creates a balanced and complete survey providing a notable contribution to the literature.
