

Your 9508 Telephone

The IP Office supports the 9508 and 9508S telephones.

The phone supports all programmable call applications feature codes. The status lights are displayed in the next figure and can be controlled by the adjacent buttons.

Functions can be assigned to the phone's call application feature buttons by your system administrator or by yourself using call application data. However, you cannot modify call application features set by your system administrator. There are limitations that the system administrator can set that are not available to you to change.
