**Research on Selected China's Legal Issues of E-Business** Yimeei Guo,2014-09-12 This book focuses on various problems arising as a result of China's e-business development. These include e-commerce aspects of the internet industry and e-governance aspects of the presiding agencies. E-privacy and online IPR protection will be of particular interest to readers as these are important international problems that China has been trying its best to deal with for many years. Each paper in this book presents valuable guidelines and suggestions to allow readers to form a sound understanding of China's e-business development.

**Industry 4.0 and Circular Economy** Antonis Mavropoulos,Anders Waage Nilsen,2020-08-17 How the marriage of Industry 4.0 and the Circular Economy can radically transform waste management and our world. Do we really have to make a choice between a wasteless and nonproductive world or a wasteful and ultimately self-destructive one? Futurist and world-renowned waste management scientist Antonis Mavropoulos and sustainable business developer and digital strategist Anders Nilsen respond with a ringing and optimistic No. They explore the Earth-changing potential of a happy and wasteless marriage between Industry 4.0 and a Circular Economy that could, with properly reshaped waste management practices, deliver transformative environmental health and societal benefits. This book is about the possibility of a brand new world and the challenges to achieve it. The fourth industrial revolution has given us innovations including robotics, artificial intelligence, 3D printing, and biotech. By using these technologies to advance the Circular Economy where industry produces more durable materials and runs on its own byproducts, the waste management industry will become a central element of a more sustainable world and can ensure its own but well beyond business as usual future. Mavropoulos and Nilsen look at how this can be achieved: a wasteless world will require more waste management and examine obstacles and opportunities such as demographics, urbanization, global warming, and the environmental strain caused by the rise of the global middle class. Explore the new prevention, reduction, and elimination methods transforming waste management. Comprehend and capitalize on the business implications for the sector. Understand the theory via practical examples and case studies. Appreciate the social benefits of the new approach. Waste management has always been vital for the protection of health and the environment. Now it can become a crucial role model in showing how Industry 4.0 and the Circular Economy can converge to ensure a flourishing, sustainable, and much brighter future.
