

Chapter 1

General: The goal of these problems are to reinforce the definitions and provide an understanding of the mole balances of the different types of reactors. It lays the foundation for step 1 of the algorithm in Chapter 4.

- P1-1.** This problem might encourage students to get in the habit of writing down what they learned from each chapter.
- P1-2.** Small open-ended question from which one could choose one or two parts. Parts (a), (b) or (e) are recommended.
- P1-3.** This problem use Example 1-3 to calculate a CSTR volume. It is straight forward and gives the student an idea of things to come in terms of sizing reactors in chapter 4. An alternative to P1-11 and P1-12.
- P1-4.** Alternative to P1-3, P1-11, and P1-12. See P1-3 above.

Problems P1-5, P1-6, and P1-7 review the definitions given in the chapter.

- P1-8.** This problem can be assigned to just be read and not necessarily to be worked. It will give students a flavor of the top selling chemicals and top chemical companies.
- P1-9.** This problem will be useful when the table is completed and the students can refer back to it in later chapters. Answers to this problem can be found on Professor Susan Montgomery's equipment module on the CD-ROM. See P1-17.
- P1-10.** Many students like this straight forward problem because they see how CRE principles can be applied to an everyday example. It is often assigned as an in class problem and part (g) is usually omitted.

Problems P1-11 and P1-12 show a bit of things to come in terms of reactor sizing. Can be rotated from year to year with P1-3 and P1-4. See P1-3 above.

- P1-13.** Asks for details of operation of an industrial reactor.
- P1-14.** Encourages and requires the student to go outside the text for information related to CRE. May be a bit early in the text to assign this problem.
- P1-15.** Encourages and requires using other sources to obtain information.
- P1-16.** Encourages using other sources to obtain information.
- P1-17.** I strongly recommend this problem be assigned. It can be used in conjunction with Problem P1-9. Professor Susan Montgomery has done a
