Your Library Is the Answer Christina T. Russo, Cathy Swan, 2015-01-22 Today's
tech savvy and digitally connected students present a new challenge for today's school librarians. This book offers the 21st
century tools and know-how necessary for educators to appeal to and challenge students to learn and to want to learn. What
are the best ways to motivate students to become engaged and develop a passion for learning? Can appealing to their desire
for socialization and constant communication attributes of their lives outside of education via the integration of cutting-edge
technologies and new media in the library or classroom serve to ignite creativity, curiosity, and critical thinking? This book
shows how you can make use of non-traditional tools such as popular social networks, collaborative technologies, and cloud
computing to teach information and communications technologies integrated with the school curriculum to improve student
learning and demonstrates how these same technologies can help you measure skills and mastery learning. The book provides
an easy-to-follow blueprint for using collaborative techniques, innovation, and teaching for creativity to achieve the new
learning paradigm of self-directed learning such as flipping the classroom or library. Readers of this book will find concrete
step-by-step examples of proven lesson plans, collaborative models, and time-saving strategies for the successful integration of
American Association of School Librarians (AASL) standards. The authors, both award-winning teachers, explain the
quantitatively and qualitatively measurable educational value of using these technologies for core curricular and information
and communications technologies instruction, showing that they both enhance student learning outcomes and provide data.
