Robotized technologies for enhanced shipyard operations: challenges and solutions Jawad Masood, Felix Vidal, David Castro, Afra M. Pertusa, Abel Feijoo, 2024-03-25 Large component manufacturing relies heavily on manual operations and human workers Human centric solutions can preserve industry specific knowledge extend capabilities and improve job performance Three robotized technologies were developed for shipyard operations ABB and KUKA robot hand guiding systems HGS a lightweight collaborative system for plasma cutting and a cost effective 3D projection system for retrofitting These technologies were developed at the open didactic factory which served as platforms for rapid technological advancement The HGS was integrated with ABB and KUKA and the 3D projection technology and lightweight collaborative system offered a cost effective solution for small and medium shipyards However transitioning to non flat surfaces presents challenges due to geometric variations and discrepancies between the computer aided design model and the actual component

Robotic Fabrication in Architecture, Art and Design 2016 Dagmar Reinhardt, Rob Saunders, Jane Burry, 2016-02-03 The book presents the proceedings of Rob Arch 2016 the third international conference on robotic fabrication in architecture art and design The work contains a wide range of contemporary topics from methodologies for incorporating dynamic material feedback into existing fabrication processes to novel interfaces for robotic programming to new processes for large scale automated construction The latent argument behind this research is that the term file to factory must not be a reductive celebration of expediency but instead a perpetual challenge to increase the quality of feedback between design matter and making

Proceedings of the 2018 International Symposium on Experimental Robotics Jing Xiao, Torsten Kröger, Oussama Khatib, 2020-01-22 In addition to the contributions presented at the 2018 International Symposium on Experimental Robotics ISER 2018 this book features summaries of the discussions that were held during the event in Buenos Aires Argentina These summaries authored by leading researchers and session organizers offer important insights on the issues that drove the symposium debates Readers will find cutting edge experimental research results from a range of robotics domains such as medical robotics unmanned aerial vehicles mobile robot navigation mapping and localization field robotics robot learning robotic manipulation human robot interaction and design and prototyping In this unique collection of the latest experimental robotics work the common thread is the experimental testing and validation of new ideas and methodologies The International Symposium on Experimental Robotics is a series of bi annual symposia sponsored by the International Foundation of Robotics Research whose goal is to provide a dedicated forum for experimental robotics research In recent years robotics has broadened its scientific scope deepened its methodologies and expanded its applications However the significance of experiments remains at the heart of the discipline The ISER gatherings are an essential venue where scientists can meet and have in depth discussions on robotics based on this central tenet
