Chemical News and Journal of Physical Science, 1895 **Greenwashing Sport** Toby Miller, 2017-07-06 Professional sports promote their green credentials and yet remain complicit in our global environmental crisis. Sports are responsible for significant carbon footprints through stadium construction and energy use, player and spectator travel and media coverage. The impact of sports on climate change is further compounded by sponsorship deals with the gas and petroleum industries, imbuing those extractive corporations with a positive image by embedding them within the everyday pleasure of sport. Toby Miller argues that such activities amount to greenwashing. Scrutinizing motor racing, association football and the Olympics, Miller weighs up their environmental policies, their rhetoric of conservation and sustainability and their green credentials. The book concludes with the role of green citizenship and organic fan activism in promoting pro-environmental sports. This is a must
