PEDIGREE LAB

Name: _____ period _____

A pedigree is a diagram of family relationships that uses symbols to represent people and lines to represent genetic relationships. These diagrams make it easier to visualize relationships within families, particularly large extended families. Pedigrees are often used to determine the mode of inheritance (dominant, recessive, etc.) of genetic diseases. A sample pedigree is below:

In a pedigree, **squares represent males** and **circles represent females**. Horizontal lines connecting a male and female represent mating. Vertical lines extending downward from a couple represent their children. Subsequent generations are, therefore, written underneath the parental generations and the oldest individuals are found at the top of the pedigree.

If the purpose of a pedigree is to analyze the pattern of inheritance of a particular trait, it is customary to shade in the symbol of all individuals that possess this trait. Other times, you will see the genotypes of the individuals written inside the circles or squares. If the genotype is unknown or partially unknown, a question mark is used in the pedigree.

Patterns of inheritance have the following modes of inheritance: autosomal dominant, autosomal recessive, X-linked (recessive), y-linked.

Here is a sample pedigree showing 3 generations:

What are the relationships between...

- 1 and 5** *Mother (1) and Son (5)* **1 and 2** _____
- 1 and 10** _____ **4 and 5** _____
- 3 and 5** _____ **5 and 8** _____
- 8 and 10** _____ **1 and 3** _____

Now that you have had a chance to familiarize yourself with a pedigree chart, you will now apply what you have learned about genetics in the construction of pedigrees for the characters in the "Harry Potter" series.
