

# IN THE EVENT OF ZOMBIE ATTACK

## 3 STEPS TO SURVIVING INFESTATION

### 1. Avoidance

### 2. Termination

### 3. Disposal

#### 1. AVOIDANCE

All zombie infestations render the location uninhabitable. The citizen's first duty is to evacuate the area and proceed immediately to an authorized Rescue Station. Only authorized Z.E.R.O. personnel will manage infestation - but, the key to an effective evacuation is COMPLETE AVOIDANCE OF HAZARDOUS CONDITIONS while en route.

##### EVACUATE

Gather family and essential small valuables only. DO NOT attempt to secure or defend property or possessions.

##### RELOCATE

Proceed immediately to the Rescue Station assigned to your area. In the absence of Z.E.R.O. Relocation Management personnel, monitor local radio broadcasts for directions.

##### DO NOT ENGAGE!

It is critical to remember that any zombies encountered during relocation are NOT family or friends but REANIMATED CORPSES INFECTED WITH A DEADLY CONTAGION. Under NO circumstances should you engage one in any kind of interaction. Contact is transmitted via a bite, and ANY interaction with a zombie results in repeated attempts to bite.

##### IN THE EVENT OF A BITE...

Apply pressure to the wound with padding found in the supplied BITE KIT until proper medical supervision can be accessed.

IF THE WOUNDED INDIVIDUAL EXPIRES after being bitten, VACATE THE PREMISES IMMEDIATELY or consult guidelines found in next section.

#### 2. TERMINATION

Engage the step only if in an unsecured location, and ONLY if you have positively identified a zombie by using the Zombie Classification Cards (supplied). Otherwise, any terminations should be referred to and executed by a duly authorized member of Z.E.R.O. or your local licensed Zombie Terminator.

##### CEREBRAL NEUTRALIZATION

The ONLY known method for effectively terminating a zombie, either by cranial penetration or blunt force trauma (A, B, C) or decapitation (D).

##### CENTER MASS

For stopping or slowing down target ONLY when distance does not permit a head shot. NOT an effective termination method.

##### LOWER EXTREMITIES

For stopping or slowing down target ONLY when distance does not permit a head shot. NOT an effective termination method.

#### 3. DISPOSAL

##### "TAPE & TAG"

After terminating the zombie(s), mark the perimeter to enable Z.E.R.O. Disposal Unit personnel to locate the remains and ship to a Mobile Acid Disintegration (M.A.D.) unit for disintegration. This can be completed in two simple "Tape & Tag" steps:

1. Mark area surrounding the remains with an appropriate length of CAUTION ZOMBIE OUTBREAK ZONE tape (supplied).
2. Attach a FORM 280 tag (supplied) to the toe of the corpse.

##### DO NOT INCINERATE!

Incineration releases airborne toxins which spread infection to the uninfected (downwind). In areas of heavy toxicity or proximity, the normally inerted deceased. This exponentially increases infestation levels.

## **Ems Zombie Guide:**

### **EBOOK: The Student Paramedic Survival Guide: Your Journey from Student to Paramedic** Amanda

Blaber, 2015-07-16 The Student Paramedic Survival Guide gives information and advice to help you succeed in your education and become a registered paramedic. The book supports you from the start of your journey as you choose a programme through study and practice placements to the final stages of registration and applying for work. Finally, the book prepares you to make the transition into your first paramedic job. To equip you with insights into what studying to be a paramedic is really like, the book is packed full of comments from students, paramedics, mentors, paramedic educators, and academics. Their expertise and experience will be invaluable as you study and prepare for practice. Other useful tools are included, such as web links for suggested further reading. The book will answer questions such as: Is this the right career for me? What do I need to consider when choosing a university and programme of study? What will I be studying? How can I make the most of the simulations that are part of my course? Who is there to support me on placements? What is it like caring for patients and their families? How can I adjust to shift work? What can I do to prepare for registration and securing my first job? The book also includes advice on making the most of your preferred learning style and guidance on how to look after yourself when you encounter traumatic events. Written by a bestselling author with the help of students, practice staff, and academics from a variety of higher education institutions, this guide for prospective and current student paramedics is the essential resource to support your journey through the excitement, challenges, and realities of being a student paramedic on a higher education programme. This is a must-buy for any student from school leaver to the mature candidate who is thinking of studying to be a Paramedic. The book comprehensively addresses everything from where and how to apply, unpicking the complex picture of fees and funding to the realities of what to expect when you get to University and what it's like on placement. With valuable contributions from current students, academics, and educators, this book explains everything you need to know and might not have thought you needed to know before you apply. Mark Nevins, Senior Lecturer, Teeside University, UK, and NMC Registered Adult Nurse and HCPC Registered Paramedic. I would consider this book as required reading for anyone considering embarking on a career as a paramedic. It is honest, informative, and true to life. I liked the way that all aspects of student life were covered, from applications to studying and placements, and finally being out in the world. This job isn't what a lot of people seem to think it is, but Amanda has gone to great lengths to myth-bust. This book shows a depth and consideration that all prospective paramedic students should appreciate. It is clear that a great deal of effort has gone into this survival guide. Mark Young, Paramedic, covering a number of areas that are part of the institutional and ambulance Trusts inductions. It is useful to note that the Survival Guide also recognises the differences in student paramedic experiences when compared to other students in universities. This means that the Survival Guide can act as an aide memoire that is available when those difficult questions come up that need an immediate answer that can allay fears and anxieties and signpost the students to the

places they can get support This aspect is helped by the shared experiences from past and present students and practitioners who act as mentors and paramedic educators to the students This book has been a long time coming and will based on my experience help the student to have a better transition towards their future professional role Lizzie Ryan Education Business Manager and Clinical Training Manager East at South Western Ambulance Service NHS Foundation Trust UK also Lecturer at Bournemouth University UK and Plymouth University UK and the Open University UK
