*House Review* ,1902      *Biophysics* W. Hoppe,W. Lohmann,H. Markl,H. Ziegler,2012-12-06 What is biophysics As with all subjects which straddle traditional boundaries between fields it eludes a precise definition Furthermore it is impossible to do biophysics without having a certain foundation of knowledge in biology physics physical chemistry chemistry and biochemistry One approach to a biophysics textbook would be to refer the student to the literature of these neighboring fields and to leave the selection of the appropriate supplementary material up to the student The editors of this volume are of the opinion that it is more useful and less time consuming to present a selection of the supplementary knowledge in concentrated form together with the subject matter specific to biophysics The reader will thus find in this book introductions to such subjects as the structure and function of the cell the chemical structure of biogenic macromolecules and even theoretical chemistry What indeed is biophysics Must we consider it to include physiology electromedicine radiation medicine etc The field has evolved continuously in recent years Molecular understanding of life processes has come more and more to the fore Just as the field of molecular physics has developed to describe structures and processes in the realm of non living systems there has been a corresponding development of molecular biophysics      **Factory** ,1919 Vols 24 no 3 v 34 no 3 include International industrial digest      **Everyday Mathematics** University of Chicago.
