Apple, Gregory J. Downey, Stephen L. Vaughn, 2012-09-25 Ever since the threads of seventeenth century natural philosophy began to coalesce into an understanding of the natural world printed artifacts such as laboratory notebooks research journals college textbooks and popular paperbacks have been instrumental to the development of what we think of today as science But just as the history of science involves more than recording discoveries so too does the study of print culture extend beyond the mere cataloguing of books In both disciplines researchers attempt to comprehend how social structures of power reputation and meaning permeate both the written record and the intellectual scaffolding through which scientific debate takes place *Science in Print* brings together scholars from the fields of print culture environmental history science and technology studies medical history and library and information studies This ambitious volume paints a rich picture of those tools and techniques of printing publishing and reading that shaped the ideas and practices that grew into modern science from the days of the Royal Society of London in the late 1600s to the beginning of the modern U S environmental movement in the early 1960s *Digital Food Cultures* Deborah Lupton, Zeena Feldman, 2020-02-25 This book explores the interrelations between food technology and knowledge sharing practices in producing digital food cultures *Digital Food Cultures* adopts an innovative approach to examine representations and practices related to food across a variety of digital media blogs and vlogs video blogs Facebook Instagram YouTube technology developers promotional media online discussion forums and self tracking apps and devices The book emphasises the diversity of food cultures available on the internet and other digital media from those celebrating unrestrained indulgence in food to those advocating very specialised diets requiring intense commitment and focus While most of the digital media and devices discussed in the book are available and used by people across the world the authors offer valuable insights into how these global technologies are

Schools and Food Education in the 21st Century Lexi Earl, 2018-02-01 Schools and Food Education in the 21st Century examines how schools enact food policy and through doing so craft diverse foodscapes that create very different food experiences in schools The school food policy discourse is made up of an amalgamation of discourses on obesity prevention nutrition education welfarism and foodiness Whilst schools endeavor to enact policy in a variety of ways this book shows how foodiness is taken up and can only be taken up differently in different schools The book s unique contribution is to identify the discourse of foodiness and to show how this discourse whilst seemingly universal is actually situated in middle class ideas and is therefore more easily taken up by certain schools The book argues that the classed nature of foodiness leads to certain food knowledges becoming marginalized or lost and this then positions some schools in tension with their local communities resulting in widely variant food experiences for children Earl demonstrates how foodiness is taken up in schools by first exploring how the foodscape at school is shaped by policy and media sources The book then examines how foodiness is taken up by schools with different SES profiles by showing how food moves through the school day Asking critical questions on class and poverty that are often overlooked this book will be of interest to researchers academics and students working on food issues related to teaching food policy and schools in the fields of education sociology and food studies It should also be of interest to policymakers parents and teachers
