Knowledge Machines Eric T. Meyer, Ralph Schroeder, 2023-05-09 An examination of the ways that digital and networked technologies have fundamentally changed research practices in disciplines from astronomy to literary analysis In Knowledge Machines Eric Meyer and Ralph Schroeder argue that digital technologies have fundamentally changed research practices in the sciences social sciences and humanities Meyer and Schroeder show that digital tools and data used collectively and in distributed mode which they term e research have transformed not just the consumption of knowledge but also the production of knowledge Digital technologies for research are reshaping how knowledge advances in disciplines that range from physics to literary analysis Meyer and Schroeder map the rise of digital research and offer case studies from many fields including biomedicine social science uses of the Web astronomy and large scale textual analysis in the humanities They consider such topics as the challenges of sharing research data and of big data approaches disciplinary differences and new forms of interdisciplinary collaboration the shifting boundaries between researchers and their publics and the ways that digital tools promote openness in science This book considers the transformations of research from a number of perspectives drawing especially on the sociology of science and technology and social informatics It shows that the use of digital tools and data is not just a technical issue it affects research practices collaboration models publishing choices and even the kinds of research and research questions scholars choose to pursue Knowledge Machines examines the nature and implications of these transformations for scholarly research

Molecular Genetics and Genomics Tools in Biodiversity Conservation

Ashwani Kumar, Baharul Choudhury, Selvadurai Dayanandan, Mohammed Latif Khan, 2022-02-01 This book provides insight into the use of molecular and genomic techniques to the study of populations of critically important species at various geographical scales It delves into a wide range of issues relevant to biodiversity conservation such as population differentiation landscape genomics ecological interactions phylogenetics phylogeography metagenomics molecular methods and data processing The current rate of biodiversity loss is unprecedented and valuable genetic resources are being lost at an alarmingly rate Effective strategies to conserve these genetic resources are essential to maintain healthy ecosystems with inter dependent species The book is an invaluable resource for training undergraduate and graduate students postdoctoral fellows and for young researchers This book is particularly useful for the policy makers and academics who want to learn about important concepts in population and conservation genetics and genomics

Discovering Molecular Genetics Jeffrey H. Miller,1996 This textbook offers teachers a one semester course in molecular genetics for use by life science majors microbiology biochemistry molecular biology or biology or pre med students The book is the syllabus for a course in molecular genetics given by the author at the University of California at Los Angeles USA for several years It adopts a case study approach based on analysis of classic and recent papers and discussion of the lives of the principal investigators concerned The book contains introductory essays which review the key concept in each course unit over 180 questions and answers which test factual knowledge derived from each unit and over 140 problems including scenarios from history mythology films and television which test students abilities to apply molecular genetic concepts Solutions and strategies for working out these problems are provided in the companion book Solutions Manual and Workbook *User-Friendly Tools Applied to Genetics or Systems Biology* Helder Nakaya, Juilee Thakar, Vinicius Maracaja-Coutinho,2020-12-01 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original Research to Review Articles Frontiers Research Topics unify the most influential researchers the latest key findings and historical advances in a hot research area Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office frontiersin.org about contact **Atlas** World Psychiatric Association,2005-11-08 This joint publication by the WHO and the World Psychiatric Association sets out information on psychiatric training and education programmes around the world based on a questionnaire and other information sources Topics covered include training programmes and infrastructure curricula and teaching methods evaluation specialisation and bilateral arrangement continuing education licensing and the role of national institutions It also includes a comparative case study of psychiatric education and training in a high income Switzerland and a low income country Uganda **Psychology Ssg Print Cdn Adapt** Kelly Bouas Henry,2007-07-25 **Current Developments in Anthropological Genetics** James H. Mielke, Michael Crawford,1980 While the previous two volumes in this series were based upon methodology theory and the relationship between ecology and population structure this book can be viewed as an in depth case study The population genetics of a multitude of diverse groups geographically distributed throughout the world was examined in the first two volumes In

contrast this volume focuses upon a single ethnic group the Black Caribs Garifuna of Central America and St Vincent Island and explores the interrelationships among the ethnohistory sociocultural characteristics demography morphology and genetic structure of the group This volume offers a broad and intensive treatment of the Black Caribs and their interactions with surrounding populations My interest in the genetics of the Black Caribs was sparked by an accidental meeting in Amsterdam Holland in March 1975 A conversation with Nancie Gonzalez at the Applied Anthropology Meetings revealed the truth is stranger than fiction history of the Black Carib peoples of the Caribbean This was a population with a small sized founding group and a unique biological success story Nancie Gonzalez was particularly interested in estimating the Carib Indian admixture in the contemporary Garifuna population Given my previous experience in estimating Spanish and African admixture in the Tlaxcaltecan population whose gene pool consisted predominantly of Indian alleles a group that appeared to be primarily African with some Indian admixture was of great interest Aside from the ethnohistorical interest I believe that such a population may add considerably to our understanding of the inheritance of complex morphological traits
