An East Asian Challenge to Western Neoliberalism Niv Horesh, Kean Fan Lim, 2017-08-03 Analysts generally agree that in the long term the biggest challenge to American hegemony is not military but rather China's economic rise This perception is spread in no small measure because Xi Jinping has in the face of patent military inferiority conducted himself much more boldly on the world stage than Hu Jintao Meanwhile China has also begun conjuring up an alternative vision for global leadership now widely termed as the China model This book therefore offers a critical and comprehensive explanation of the China model and its origins Using a range of case studies covering varying historical and geographical approaches it debates whether the Chinese experience in the last three decades of economic reform should be interpreted as an answer to the reigning hegemony of neoliberalism or rather a further reinforcement of it To answer these questions it provides an investigation into what China may have learned from its East Asian neighbours earlier economic successes It also examines how it is

responding to and might even reconfigure the world political economic system as it develops fresh and potentially more powerful regulatory capacities Providing a multi dimensional analysis of the China model the book will be of interest to students and scholars of Chinese Economics Economic Geography and Chinese Studies **Essays in Manuscript Geography** Wendy Scase,2007 The medieval English West Midlands has long been associated with the production of vernacular texts in Old and Middle English and with the making of several famous manuscripts The aim of this volume is to re think assumptions about medieval literature and the region in the light of new research in medieval book history A series of specially commissioned essays in manuscript geography examines the making and use of texts and books in relation to cultural networks in the region and beyond Included are case studies of manuscripts of Worcester and the Worcester diocese from the eleventh to the thirteenth centuries investigations of manuscript production in fourteenth century Shropshire and its wider regional links and essays on textual cultures in Warwickshire from the activities of the aristocrats and gentry of the fifteenth and sixteenth centuries to the projects of later antiquarians Essays in the final section of the volume reflect on the possibilities of large scale corpus based research on medieval manuscript books Collectively the essays identify and explore some of the investments of traditional regionalist accounts of vernacular literary culture and model new theoretical and methodological approaches The Routledge Handbook of Urbanization and Global Environmental Change Karen Seto,William Solecki,Corrie Griffith,2015-12-22 This volume provides a comprehensive overview of the interactions and feedbacks between urbanization and global environmental change A key focus is the examination of how urbanization influences global environmental change and how global environmental change in turn influences urbanization processes It has four thematic foci Theme 1 addresses the pathways through which urbanization drives global environmental change Theme 2 addresses the pathways through which global environmental change affects the urban system Theme 3 addresses the interactions and responses within the urban system in response to global environmental change Theme 4 centers on critical emerging research The History of Cartography, Volume 4 Matthew H. and neoliberal regeneration interventions that prioritise the past from the 1980s to the present The author examines how the shift towards city centre focused redevelopment and event led initiatives has implications for the way residents make sense of their conceptualisations of home and demonstrates how the shift in regeneration focus discourse and practice away from Liverpool s neighbourhood districts and towards the city centre has produced changes in the ways that residents identify with neighbourhoods and the city centre with prominence being given to the latter Employing Pierre Bourdieu s concepts of habitus and field as mechanisms for understanding different senses of home and shifts from localised views to globalised views this book will appeal to those with interests in urban sociology regeneration geography sociology home cultures and cities
