

Human Inheritance Lab

Objectives

To determine phenotypic characteristics and genotypes for human inheritable traits.
To determine the frequency (%) of dominant and recessive trait in population.

Materials

Index

Procedure

Obtain the phenotypic characteristics and the corresponding gene genotypes for the traits listed below:

- In the first row of the table 1, list the 27 characteristics. Then make sure that the dominant phenotype and the recessive phenotype. Use the examples in the table for correct labeling.
- In the corresponding row of table 1, write your phenotypes and determine its dominance or recessive.
- In the third column of table 1, write your genotype for each trait.

Questions

- If you show the recessive trait, then you must be homozygous recessive.
- If you show dominant trait, you may be heterozygous/dominant or homozygous for that trait.
 - If one of your parents shows the recessive trait, then you must have passed on a gene for the recessive trait, and you must be heterozygous for that trait.
 - If neither of your parents shows the recessive trait, you may not know if you are heterozygous or homozygous dominant for that trait. In that case, you **may** provide genotypes (heterozygous and homozygous dominant).

*** If you need help, you may ask your parents about their traits. * DO NOT TALK TO OTHERS!

***** If your parents get married before you, then you can't ask them, please give **any** possible genotypes for dominant/dominant gene.

Human Inheritance Lab 22 Answer Key

Padhraic Smyth

Human Inheritance Lab 22 Answer Key:

The AGT Cytogenetics Laboratory Manual Marilyn S. Arsham, Margaret J. Barch, Helen J. Lawce, 2017-04-24

Cytogenetics is the study of chromosome morphology structure pathology function and behavior The field has evolved to embrace molecular cytogenetic changes now termed cytogenomics Cytogeneticists utilize an assortment of procedures to investigate the full complement of chromosomes and or a targeted region within a specific chromosome in metaphase or interphase Tools include routine analysis of G banded chromosomes specialized stains that address specific chromosomal structures and molecular probes such as fluorescence in situ hybridization FISH and chromosome microarray analysis which employ a variety of methods to highlight a region as small as a single specific genetic sequence under investigation The AGT Cytogenetics Laboratory Manual Fourth Edition offers a comprehensive description of the diagnostic tests offered by the clinical laboratory and explains the science behind them One of the most valuable assets is its rich compilation of laboratory tested protocols currently being used in leading laboratories along with practical advice for nearly every area of interest to cytogeneticists In addition to covering essential topics that have been the backbone of cytogenetics for over 60 years such as the basic components of a cell use of a microscope human tissue processing for cytogenetic analysis prenatal constitutional and neoplastic laboratory safety and the mechanisms behind chromosome rearrangement and aneuploidy this edition introduces new and expanded chapters by experts in the field Some of these new topics include a unique collection of chromosome heteromorphisms clinical examples of genomic imprinting an example driven overview of chromosomal microarray mathematics specifically geared for the cytogeneticist usage of ISCN s cytogenetic language to describe chromosome changes tips for laboratory management examples of laboratory information systems a collection of internet and library resources and a special chapter on animal chromosomes for the research and zoo cytogeneticist The range of topics is thus broad yet comprehensive offering the student a resource that teaches the procedures performed in the cytogenetics laboratory environment and the laboratory professional with a peer reviewed reference that explores the basis of each of these procedures This makes it a useful resource for researchers clinicians and lab professionals as well as students in a university or medical school setting
