

Chapter 13

ColorFlex®

Notice: Use of this equipment in a manner not specified by the manufacturer may impair the protection afforded by the equipment.

The ColorFlex system consists of a ColorFlex optical sensor and an IBM-compatible computer composed of the system unit, monitor, keyboard, and mouse. The computer may have been user-provided or purchased with the sensor and software. A printer may also be used with the system.

The ColorFlex Sensor

The ColorFlex spectrophotometer is a versatile, compact color measurement instrument that can be used on products of virtually any size and in industries as diverse as paint and textiles. It is available in two different models, 45°/0° and diffuse/8° (sphere). The label on the bottom of the instrument identifies the geometry. The instrument is designed for use with the sample port facing up or forward.

The Read Button

The **Read** (lightning bolt) button on the keypad, also known as the “Sensor button,” can be used to perform any command or macro assigned to it through the **Toolbar** command on the **Configure** menu. By default, this button activates a sample measurement. To assign it another function, see the **Toolbar** section in the **Configure** chapter, Chapter 9.

Hunter Lab Manual
