## Market Structures Chapter Answer:

*Market Structure and Industrial Performance* Claudio R. Frischtak, Richard S. Newfarmer, John H. Dunning, 1994

Unemployment, Market Structure and Growth Rüdiger Wapler, 2012-12-06 In his Ph D thesis Rudiger Wapler analyses the causes of the persistently high unemployment rates especially in continental Europe Particular emphasis is placed on imperfect labour and product markets on the one hand and on the numerous links between unemployment innovations and growth on the other Hence Rudiger Wapler provides an important contribution towards a better understanding of both the development of labour markets as well as the dynamics of growth To aid readers with only little prior knowledge of labour markets the book presents the most common theories of unemployment 1 trade union models in which union bargaining power leads to wages above their market clearing level 2 efficiency wage models in which employers voluntarily pay higher wages in order to motivate or discipline their workers or to reduce the job turnover rate as well as 3 matching models in which unemployment is caused by the continuous turnover of jobs and workers In addition emphasis is placed on the fact that labour needs to be treated as heterogeneous a fact often neglected in the literature Subsequently these labour market foundations are integrated with modern theories of innovations and growth making the approach much more relevant and plausible Without doubt the generalisations of the models performed by Rudiger Wapler show that there are limits to such formal analysis Due to the increasing number of interdependencies it is doubtful whether even more complex models provide additional usable insights
