ANSWER THE FOLLOWING QUESTIONS AS YOU COMPLETE EACH PART OF THE VIRTUAL LAB

Answer the following questions as you complete each part of the virtual lab.

Part 1: Introduction

1. As you begin the virtual lab, you will see a field of 1000 birds and a population of 1000 seeds. What happens when you introduce a mutation into the population? How does the population change over time?

Initially, the birds are green. When you introduce a mutation, the birds change color. The population of seeds decreases because the birds are eating them. The birds that are green are able to eat the seeds, while the birds that are blue are not. This leads to a change in the population of birds over time.

2. As you continue to play the virtual lab, you will see that the population of birds is changing. What happens when you introduce a mutation into the population? How does the population change over time?

Eventually, the birds are all blue. This is because the birds that are green are being eaten by the birds that are blue. The birds that are blue are able to eat the seeds, while the birds that are green are not. This leads to a change in the population of birds over time.
