new approach to improving foundational teaching and learning for schoolchildren living in working class poor and remote rural communities in resource constrained systems like South Africa At the core of this book is the theory and evidence for a powerful new interlocking and mutually reinforcing change model Inspired by the AIDS treatment story the three pronged approach of structured daily lesson plans appropriate and high quality educational materials and one on one instructional coaching to help teachers transform their instructional practices in early grade classrooms shows that it will improve learning outcomes For education systems defined by low levels of early grade learning and profoundly unequal outcomes The Education Triple Cocktail offers a theoretically informed evidence based way forward This book will be of immense use to teachers students of Education policymakers and parents

Twenty Years of Education Transformation in Gauteng 1994 to 2014 Felix Maringe, Martin Prew, 2015-05-05 Twenty Years of Education Transformation in Gauteng 1994 to 2014 An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994 These essays talk to what a provincial education department does and how and why it does these things whether it be about policy resourcing or implementing projects Each essay is written by one or more specialist in the relevant focus area The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years both nationally and provincially There has been no attempt to fit the books chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the Gauteng Department of Educations present and past We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years

Confronting Exclusion African Minds, 2013 South Africa has made important political strides over the past two decades It has created a framework of democratic legislative executive and judicial institutions that mark a clear break from the apartheid past In theory they are inclusive and offer every citizen equal access to constitutionally protected rights Their capacity to deliver however is coming under increasing pressure and as this happens citizen confidence in their efficacy is waning Much of the pressure which ultimately may affect their legitimacy in the eyes of ordinary citizens stems from the desperation and sense of economic exclusion experienced by those who find themselves at the wrong end of South Africa s grossly unequal society If this decline in trust persists the cohesive effects of the country s democratic institutions will diminish and instability will become an increasingly common feature of political contestation An immediate but only partial remedy to the current state of affairs would be to prioritise transparency accountability and leadership integrity within the system to restore trust in the bona fides of key institutions The longer term challenge will be to counter a growing sense of economic exclusion where violent police action rather than democratic process is increasingly employed to stave off the manifestations of material anxiety experienced by struggling citizens This edition of the Transformation Audit titled *Confronting Exclusion* focuses on

instances of such exclusion but as in previous years also prioritises the search for inclusive economic policy and future strategies to address them By looking at each of the four chapter areas it seeks to find answers to the challenge of a society in which the promise of true freedom and equal rights will remain only that until people feel equipped to be in charge of their own destiny and that of their children **Traffic Control Devices, Visibility, and Rail-highway Grade Crossings, 2003**
