  - When you change the digital time setting.
  - When you change the Home City code and/or DST setting.
  - If the analog time does not match the digital time for some reason, use the procedure below to adjust the analog time to the digital time.
  - Whenever you need to adjust both the digital and the analog time settings manually, make sure you adjust the digital setting first.
  - Depending on how much the hands have to move in order to adjust to the digital time, it may take some time before they stop moving.

To adjust the analog time

1. In the Timekeeping Mode, press (C) five times to enter the Hand Setting Mode.
2. Hold down (C) until the current digital time starts to flash, which indicates the analog time setting screen.
3. Press (C) to advance the analog time setting by 20 seconds.
  - Holding down (C) advances the analog time setting at high speed.

- If you need to advance the analog time setting a long way, hold down (C) until the time starts advancing at high speed, and then press (C). This locks the high-speed hand movement, so you can release the five buttons. High-speed hand movement continues until you press any button. It will also stop automatically after the time advances 12 hours or if an alarm starts to sound.

4. Press (C) to exit the setting screen.
- The minute hand will be adjusted slightly to match the seconds when you exit the setting screen.
