Richards,2015-09-17 TESOL ESL Teaching **Face2face** ,2005 **Applied Linguistics and Materials Development** Brian Tomlinson,2012-12-06 Focuses for the first time on materials development and applications of current research and theory for the main areas of applied linguistics e g second language acquisition pragmatics vocabulary studies There are many books on applied linguistic theory and research and there are now a number of books on the principled development of materials for language learning but this book takes a new approach by connecting the two concerns Each of its chapters first of all presents relevant theories and

research conclusions for its area and then considers practical applications for materials development. The chapters achieve these applications by reporting and commenting on current theory and research by analysing the match between current published materials and current theory and by suggesting and exemplifying applications of current theory to materials development. Grammar in ELT and ELT Materials Graham Burton, 2023-06-06. This book investigates the content of the grammar syllabus typically employed in mainstream English Language Teaching. Using a mixed methods approach, the author examines how the syllabuses used in coursebooks are actually constructed, how they evolved, and how valid their contents are as a basis for teaching. The research reported consists of a broad exploration of primary sources in order to outline the evolution of ELT pedagogical grammar, ten interviews with key ELT authors and publishing professionals which allows for the investigation of the decision-making processes underlying the choice of grammar content in ELT teaching materials, and finally the presentation of case studies which examine three areas of grammar, analysing the evolution of their treatment in ELT materials, both historical and contemporary, and comparing their current treatment to data on real learner use. This book contributes to the literature on syllabus design and pedagogical grammar and builds on existing research into materials design. It will be of interest to researchers and professionals working in the fields of applied linguistics, pedagogical grammar, curriculum design, and materials design.
